SUMMARY

I am a developer with 2 years of experience passionate about crafting fast, responsive, and modern web applications. My core stack includes React, Next.js, Tailwind CSS, Express.js, and AI integrations. I pride myself on staying ahead of the curve, continuously adapting to new web development trends to build highly scalable, future-ready digital experiences..

WORK EXPERIENCE

Junior Web Developer Intern

july 2025 - Nov 2025

Mercantile venture partners (Clark, Pampanga)

- Collaborated with a team of developers to build and test features for a React-based web app
- Fixed front-end bugs and improved UI responsiveness across mobile and desktop
- Used online repository for version control and daily stand-up contributions in sprints
- Wrote unit tests to ensure app stability during updates

feb 2026 - June 2026

Web Developer (Upwork freelance)

Upwork (Houston, Texas) - (London,United kingdom) - (Brisbane Australia)

- Here is a short, punchy version perfect for a resume:
- E-Commerce Development: Built a responsive, high-performance website seamlessly integrated with the Shopify Storefront API for secure checkout and live inventory tracking.
- AI Product Recommendations: Implemented a smart recommendation engine that analyzes shopper behavior to suggest relevant products and boost sales.
- AI Customer Support: Integrated an intelligent AI chatbot to handle customer FAQs, track orders, and resolve issues instantly.
- Smart Search: Enhanced the site's search bar with Natural Language Processing (NLP) to better understand user intent and deliver more accurate product results.
